

Acoustic comfort in open-plan offices

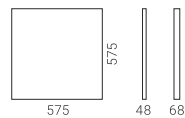

MOSU Light are lightweight, sound-absorbing wall and ceiling panels that improve office acoustics and serve as an inspiring and functional interior solution.

Panels are made of acoustic foam offering class A (for a 68 mm panel) or class C (for a 48 mm panel) sound absorption.

Thanks to their lightweight design, these acoustic panels are easy to transport and easy to install. MOSU Light are available in three design options: wall and ceiling panels, hanging panels, and Armstrong ceiling panels (integrated or hanged on a wire rope). The panels have multiple different fitting options and can be attached to a number of surfaces, even glass.

Implement your creative ideas by using acoustic panels of three different sizes and two different depths. You can also choose from our wide range of fabrics and a variety of colour options.
